5.	Ne	w Features9	1
6.	Ne	w Form Versions	)

This document sets out the changes made to CoreBIS in this release. The release is made up of the following types of updates.

- 1. Monthly Changes
  - a. Market Share Data
  - b. Validation / Derivation rule updates
  - c. APRA label data
- 2. Code updates
- 3. Enhancements to Existing Features
- 4. New Development Features
- 5. New Form Versions

# 2. Monthly Updates

#### 2.1 Market Share

This month the following was updated.

- Monthly ADI statistics

#### 2.2 PET Label data

A new set of PET label file is provided.

## 2.3 Validation / Derivation

Validation and Derivation rules will not be updated this month.

# 3. Code Updates

### 3.1 CU145: ARF\_114\_0v3 formatting (Risk:L)

Some missing borderlines were corrected in the ARF\_114\_0v3 form.

#### 3.2 CU147: Check Derivation Rules for new form versions (Risk:M)

There have been a few new forms released where custom derivation rules were required. All new form version releases have been reviewed and appropriate derivation rule files updated.

# 3.3 CU148: Element Name removed when converted from Child to Parent (Risk:L)

An issue was raised with the "Edit Structure" screen. When an n element is turned into a consolidation the elements alias (name) would disappear. This has been fixed now, however we are seeing issues with the element being cached by the web portal, which makes it appear as though it isn't. A log off/on fixes this.

#### 3.4 CU149: Unused Blobs (Risk:L)

The server would raise an error on startup with some missing application files. As part of this card we also cleaned up some old application files.

## 3.5 CU151: Landing remove Facebook icon (Risk:L)

The Facebook icon from the landing page was removed, as the CoreBIS/Cortell Facebook page has been discontinued.

# 4.1 EF132: Add "Format Measure" button to CoreBUILD dimensions screen. Allow format to measures. (Risk:L)

The CoreBuild Dimension screen has a new button that allows the creation of predefined formats, currently these are only updatable via the Perspective client.

This new format setup is only available for measure dimension types.

When Custom is selected, a user can create their formats.

## 4.2 EF134: Add a License Summary to the Security Menu. (Risk:L)

To simplify the license control for our CoreBIS clients, the security screen was redesigned to show how many licenses are entitled and how many are in use.

No new features this month.

Commercial – in Confidence CoreBIS - Release Notes - 2022\_08\_31.docx No new form versions this period.
