When mapping a table, the row dimension often required a OI code consolidation to be built that had the elements for that table. This is no longer required, the system will automatically find those items and use them.

4.2 EF40: Additional Email Parameters

Raised by Teachers Mutual Bank: 2 new parameters can be used in the emails.

- ?SenderUser?

This represents the user performing the task, be that submitting or rejecting.

- ?Reason?

The rejection reason can now be added to the email.

4.3 EF41: Workflow to incorporate Return and Notes

Raised by Beyond Bank: The forms will now be grouped by the Return Name. The notes column has been added to allow users to write notes against each task.
