- 6. New Form Versions 9**

1. Summary

This document sets out the changes made to CoreBIS in this release. The release is made up the following types of updates;

1. Monthly Changes
 - a. Market Share Data
 - b. Validation / Derivation rule updates
 - c. APRA label data
2. Code updates
3. Enhancements to Existing Features
4. New Development Features
5. New Form Versions

2. Monthly Updates

2.1 Market Share

This month the following was updated;

- Monthly ADI statistics
- Quarterly Performance Statistics
- Quarterly Property Statistics

2.2 PET Label data

A new set of PET label file are provided.

2.3 Validation / Derivation

APRA did updated the validation and derivation rules this period.

3. Code Updates

3.1 CU69: Initial schedule of data load does no run if set for current date.

If you set the data loads to import data in the current month it did not pick up the date until the next month. This has been fixed.

4. Enhancements to Existing Features

4.1 EF56: Allow CoreBIS to run with 2 decimal places on all forms

Raised by TMB: APRA responded to TMB confirming that form data can be submitted in 2 decimal places even though the precision for the form is 0 decimal places.

A optional control parameter has been added to the system that allows all forms to be overwritten with a minimum decimal place, thus allowing forms with 0 decimal places to be reported as 2 decimal places, but if a form had 3 decimal places as default then it would stay as 3 decimal should you set the override to 2 decimal places.

5. New Features

No new features have been released this period.

6. New Form Versions

Any changes made by APRA to the taxonomy can be reviewed here;

<https://www.apra.gov.au/taxonomy-changes>

There are 2 new form versions this period;

- arf_210_1av11
- arf_210_1bv8
