# 1. Summary

---

This document sets out the changes made to CoreBIS in this release. The release is made up of the following types of updates.

1. Monthly Changes
  - a. Market Share Data
  - b. Validation / Derivation rule updates
  - c. APRA label data
2. Code updates
3. Enhancements to Existing Features
4. New Development Features
5. New Form Versions
6. Changes to the APRA Connect Taxonomy

## **2. Monthly Updates**

---

### **2.1 Market Share**

This month the following was updated.

- Monthly ADI statistics

### **2.2 PET Label data**

No new PET label files are required this month.

### **2.3 Validation / Derivation**

No Validation and Derivation rules have been released this month.

### 3. Code Updates

---

#### 3.1 CU 205: Movement Report Locking cells of Variances. (Risk: L)

The code update "locks" the Movement Report so that the Variance columns can not be overwritten.

#### 3.2 CU 206: New Element Report Locking cells. (Risk: L)

The code update "locks" the New Element Report, so a user cannot change values.

#### 3.3 CU 207: CoreBUILD lacks security to export tagged cube data. (Risk: L)

The security on the "Tagged Cube Review Data Load" screen was reviewed, as only Admins could Archive/Export the data after a period version combination had been closed/locked. The code update fixes this problem, so the picklist that shows the options works even when a period version has been locked for a user with CoreBuild access.

## 4. Enhancements to Existing Features

### 4.1 EF155: Automatically recalc the Used flag when opening "Check Data Loaded". (Risk: L)

When an Attribute, Base or Lite cube is selected in CoreBuild from the Cube Screen into the Base Load Data screen, the "Check Dates Used" action (button) is automatically applied, so the users don't have to click it after the screen loads.

### 4.2 EF156: Security for End Users to only do Mapping. (Risk: L)

A new security group called UserMapping was created. The users of this group can map data in table and non-table mapping assignments without the requirement of belonging to the CoreBUILD security group. This new group works with the users' Form and Entity security.

**CoreBIS SECURITY - ASSIGNMENTS** [Return to Security Menu](#)

**New Assignment**

UserName: Ben Brown  
 Group: UserMapping

[Assign](#)  
[Unassign](#)

UserName	Group
Admin	ADMIN

### 4.3 EF157: Workflow User Assignments Screen - Read Only Users. (Risk: L)

With this enhancement, the "Workflow Data User Assignments" Screen and "Workflow Form User Assignments" Screen should show READ and WRITE users. When a user is granted "READ" access, they should not allow assignment to Review/Approved/Submit, but should still be assigned read to the tasks.

**CoreBIS FORM USER ASSIGNMENTS** [Recalculate](#) [Return to Workflow Admin](#)

Select Workflow Version: WF\_2023-03-31\_Submission [Populate Current Security](#)

Populate from WF Version: WF\_2023-03-31\_Submission
